

The following is a list of events of the year 2026 in artificial intelligence, as well as predicted and scheduled events that have not yet occurred.

Events

January

9 January – xAI limits use of image generation to paid users following the generation of sexually explicit deepfakes.

10 January – Indonesia blocks access to Grok due to nonconsensual sexualised deepfakes.

11 January – Malaysia blocks access to Grok due to nonconsensual sexualized deepfakes.

16 January – The Department of Information and Communications Technology (DICT) blocks Grok in the Philippines due to nonconsensual sexualised deepfakes.

21 January – The Department of Information and Communications Technology (DICT) lifts their ban on Grok.

23 January – Malaysia lifts their ban on Grok.

February

2 February – Indonesia lifts their ban on Grok.

3 February – Ofcom launches an investigation into X.

9 February – OpenAI tests advertisements for ChatGPT in the United States.

13 February – GPT-4o is retired.

March

24 March – The city of Baltimore sues xAI, accusing its chatbot Grok of generating sexualized images of people without their consent.

April

26 April – OpenAI's video generation tool app Sora is shutdown publicly.

May

7 May – European Union Council and European Parliament reach a provisional agreement to streamline artificial intelligence rules.

June

1 June – Florida Attorney General James Uthmeier announces that Florida has filed a lawsuit against OpenAI's CEO, Sam Altman, and AI-chatbot ChatGPT, accusing the chatbot of putting profit over safety. This lawsuit is the first to be filed by a U.S. state against ChatGPT.

30 June – United States lifts export restrictions on Anthropic's Claude Fable 5 and Claude Mythos 5.

July

21 July – OpenAI says its GPT-5.6 Sol and internal model hacked into Hugging Face's data processing systems by itself, in what is believed to be the first instance of an autonomous cyberattack performed by an AI agent.

August

6 August – The design of novel bacteriophage genome through generative AI is announced, which was used to fight natural bacteriophage-resistant bacteria.
