

The following is a list of the 20 largest settlements reached between the United States Department of Justice and pharmaceutical companies from 2001 to 2013, ordered by the size of the total settlement. The settlement amount includes both the civil (False Claims Act) settlement and criminal fine. Glaxo's \$3 billion settlement included the largest civil False Claims Act settlement on record, and Pfizer's \$2.3 billion (\$3.5 billion in 2022) settlement including a record-breaking \$1.3 billion criminal fine. Legal claims against the pharmaceutical industry have varied widely over the past two decades, including Medicare and Medicaid fraud, off-label promotion, and inadequate manufacturing practices. With respect to off-label promotion, specifically, a federal court recognized off-label promotion as a violation of the False Claims Act for the first time in *Franklin v. Parke-Davis*, leading to a \$430 million settlement.
